### BONITA BRILTEX

A nossa gama mais minimalista, mas provavelmente a de maior facilidade de adaptação a todos os espaços, áreas, diferentes utilizações.

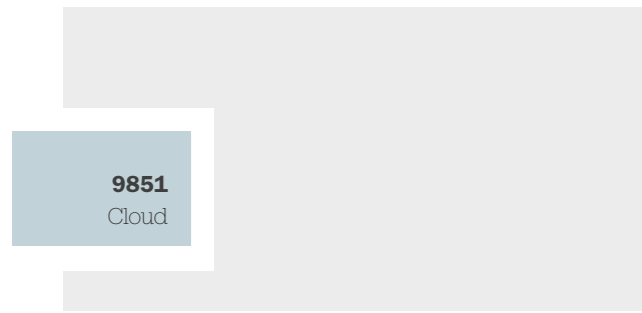

Apesar do seu aspecto simples, não é por isso que lhe dedicamos menos cuidado, pois é produzida segundo elevados padrões de qualidade, quando comparada sobretudo com outras opções no mercado.

Esta tela de cor lisa, que o nosso processo de fabrico lhe garante um ligeiro brilho e elegante toque, aliada a uma tela branca, colocada entre a tela de cor e o falso-tecido, que não deixa que a cor seja visível no verso, dando-lhe para além de tudo uma maior resistência e a distingue das demais.

Our most minimalistic line which probably has the biggest possibility to adapt to all the spaces and to different usages.

Despite its simple appearance, equal care is taken. This article is produced according to the highest standards of quality when being compared to other options available on the market.

The plain color sheet, that our production process gives a slight shine effect and an elegant look, which aligned with a white foil that is placed between the color foil and the non-woven fabric, doesn't allow the color to be visible on the reverse side. At the same time, it gives a better resistance to the material allowing for the product to be distinguished.

### BONITA EFFECTS

Qualidade standard com toque texturado. A cuidada escolha dos motivos que melhor combinam com o tipo de toque pretendido, é um dos objetivos e um dos maiores desafios desta gama. Existem diferentes tipos de textura/gravação que podem ser utilizadas na produção. Neste catálogo apresentamos 2 soluções, uma a que damos o número 98, que se assemelha muito a um efeito tipo linho, suave e delicado, e uma segunda a que damos o número 90, que é mais forte, mais pronunciada, mais poderosa.

In our catalog we are presenting two solutions, one that we have given number 98, a line which has a linen and delicate effect and other that we have given number 90, a line that is stronger and has more accentuated effect.

**BONITA TEX**

Mais uma das telas de qualidade superior, em que a impressão se encontra protegida por uma tela de cristal transparente liso, e onde a grande diferença para a tela Feltex é o suporte, pois neste caso é utilizado um não-tecido tradicional, mantêm-se altos níveis de qualidade, mas um pouco mais económico.

A qualidade Bonita nestas gamas, Bonita-Feltex e Bonita-TEX, sempre foi referência no mercado, pois os nossos elevados níveis de exigência de produção e de satisfação do cliente sempre nos levaram a estar na vanguarda.

One more article with superior quality, where the print is protected with a glass laminated transparent sheet. The biggest difference between Bonita Tex and Feltex is the backing material as in Bonita Tex we are using traditional non-woven backing. At the same time, we are preserving high levels of quality but gaining a bit more economic product.

The Bonita quality in these two ranges, Bonita-Feltex and Bonita-TEX, were always referenced in the market due to their quality features, since our high-level quality production criteria and customer satisfaction levels always led us to be ahead.

### BONITA FELTEX

O topo de gama da coleção de mesa Bonita, composta por 3 telas distintas. Uma tela estampada protegida por uma tela de cristal transparente, e como suporte um tecido em algodão.

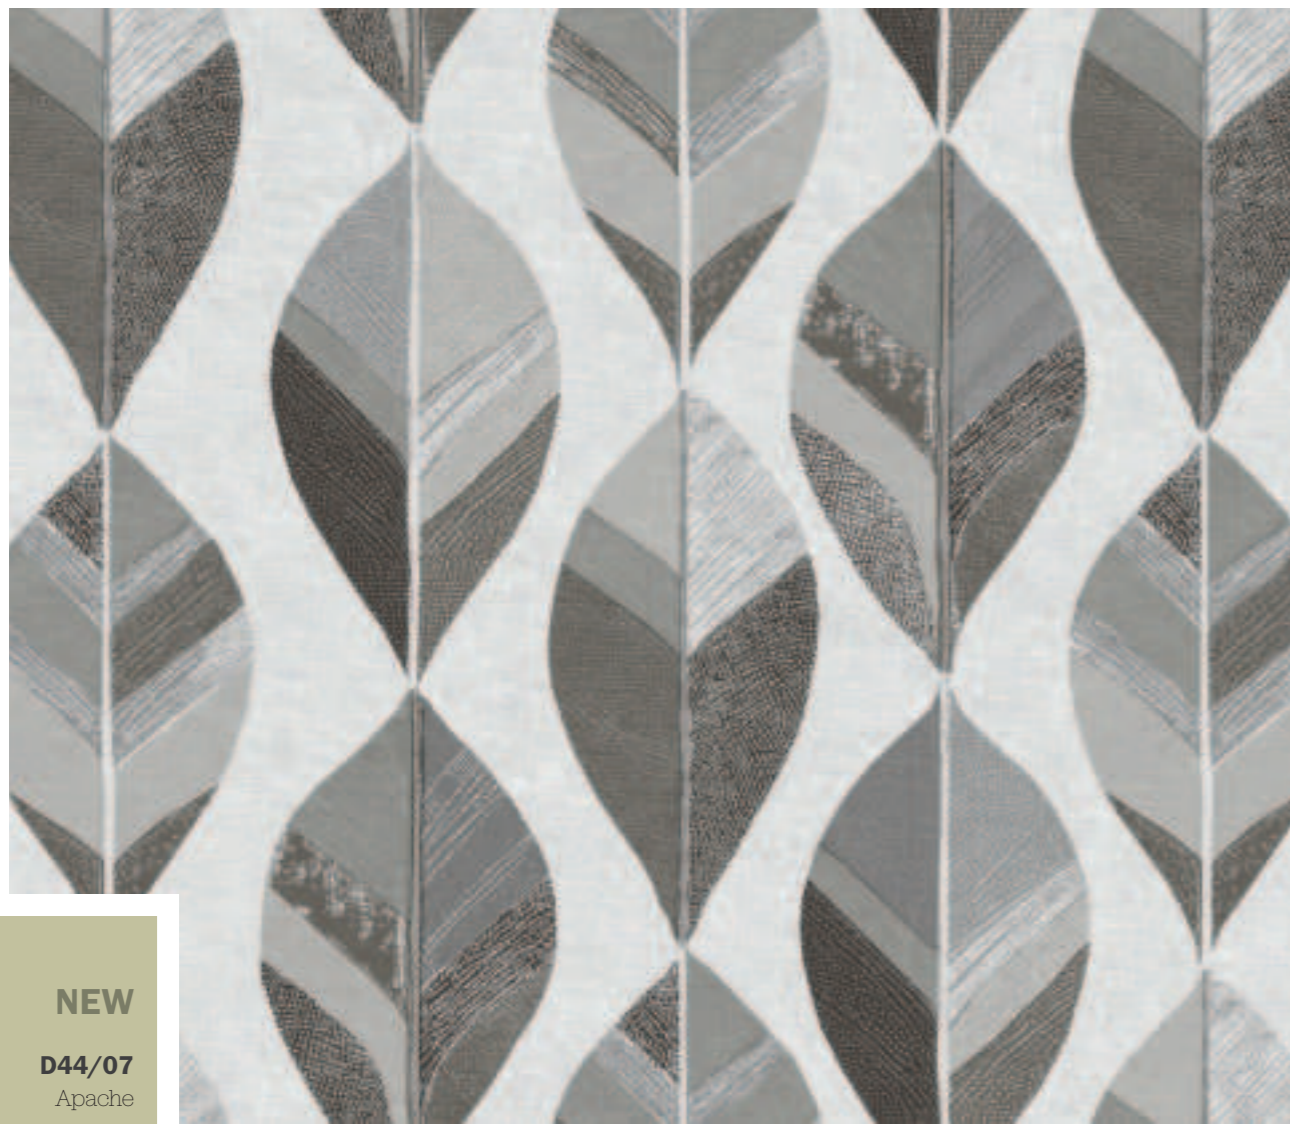

A tela de Cristal no topo da tela estampada, protege o estampado e mantém-no com as suas características originais por muito mais tempo. Esta protecção não lhe é somente útil durante a utilização da tela, mas também quando colocada no ponto de venda assim como na embalagem.

A tela de algodão no verso, confere-lhe um toque muito mais suave que o habitual não-tecido, assim como a gravação na tela final, que lhe proporciona uma sensação muito agradável ao toque.

Our highest quality in Bonita collection, a sheet that consists of three different sheets joined in one. A printed foil is laminated with glass clear coating and as a support has a backing in cotton fabric.

Glass clear coating that is placed over the printed foil protects the print and maintains its original characteristics for a longer period of time. This special type of protection is not only useful while the sheet is being used, but also when the sheet is exposed at the point of sale or when inside of the packing.

The cotton textile on the reverse side ensures a much more soft touch than the usual non-woven, as well as the engraving on the final foil, that gives a pleasant sensation to the touch.
